

Other Uses for *Microbe Balancer*

Oral Care: Put a few drops of *Microbe Balancer* on your toothbrush before brushing to eliminate microbes in your mouth. You will probably experience a numbing of the tongue and gums for 20-30 minutes after brushing. You may also notice the elimination of dead skin from the mouth and gums. The taste is easy to get used to because your teeth, and breath have never felt cleaner! **Caution:** Test your sensitivity first by diluting the product at least 10-1 (water-*Microbe Balancer*).

Shampoo and Body Wash: Use about a half teaspoon or so to lather your hair and wash your body.

Topical Spray: Dilute 31-1 (31 parts distilled water to 1 part *Microbe Balancer*). This works out well with a 32 oz. container with thirty-one ounces of distilled water and one ounce of *Microbe Balancer*. This will remain effective indefinitely and is perfect for refilling smaller spray bottles. Spray on any skin issues twice per day. **Caution:** Applying to skin undiluted will cause redness and irritation. Avoid direct sunlight after spraying this product on your skin as it will increase sensitivity to sun.

Burns: Dilute 31:1. Spray burns with *Microbe Balancer* several times a day. If possible spray the affected area as soon as the burn occurs. If using for sunburn spray one to two times per day.

Other Applications for 31:1 Dilution are:

Ears, sinuses, enema, douche.

Meat and Produce Cleanser: Spray meat fish and produce. Rinse thoroughly to eliminate residual produce taste

Caution: Don't get *Microbe Balancer* in your eyes. Causes temporarily blurred vision and redness of the eyes. Flush

with cool water.

Nails: Dilute 20:1. Soak affected nails for 15-20 minutes at least one time per day. Spraying the nails using the same dilution may also be beneficial.

Bubble Bath: Put a tablespoon or more of *Microbe Balancer* in your bathtub, Jacuzzi or hot tub. Soak for 30 minutes to an hour. The skin is the largest organ and we need to keep it clean and detoxified as well as any other organ.

Lawn, Garden and Indoor Plants: Dilute 127-1 (127 parts water to 1 part *Microbe Balancer*). This works out well with a gallon container with one hundred and twenty seven ounces of water and one ounce of *Microbe Balancer*. This dilution may be used on any plant, shrub, tree, flower etc. as often as you water or spray to grow healthier plants.

Grease Remover: Dilute 20:1. Spray on grease or stains. Won't harm colored fabrics. Spray on greasy dishes. Great for removing grease from skin.

Microbe Balancer

Antimicrobial & pH Balancer

Introducing **Microbe Balancer**

Antimicrobial & pH Balancer

Microbe Balancer is All-Natural & Safe

Microbe Balancer is an all natural plant based antimicrobial supplement for human and animal consumption. It is produced using a proprietary blend of pollinated plant esters and processed using a highly advanced proprietary method. Tests performed at a major university and a top toxicology lab confirmed that this product is non-caustic and all natural. The following is a quote from a study from a major university: *"This is to confirm based on three tests at various concentrations tested that 10ml of (*Microbe Balancer) tested, showed not to contain any caustics or butyls. The results showed the same as a pollinated ester found in many all natural derivatives associated with plants themselves".*

*Microbe Balancer is a private label and is inserted to replace the product's original name.

Microbe Balancer is Effective

In another major university study the *Microbe Balancer* product killed 100% of all five bacteria that were studied (in vitro) including e-coli, salmonella and listeria. Although *Microbe Balancer* is extremely effective at eliminating harmful microbes it doesn't harm good cells. This unique product is able to identify the unhealthy protein molecules of the microbes and "melt" them, reducing them to their base elements while not harming any good cells. The distinction between good cells and bad cells is made based upon the structure of the protein contained therein.

Microbe Balancer Helps Balance pH

With a pH of around 10, *Microbe Balancer* is also a great pH balancer. This product may help create a healthier environment for good bacteria to flourish in the body. It is in

a low pH (acidic) environment that harmful microbial entities exist and the beneficial bacteria struggle. The balancing of low pH increases oxygen in the body which boosts overall immune health and decreases the risk of many unhealthy conditions in the body.

THE SCIENCE

Diseased cells often harbor improper proteins due to damaged DNA or viral infection. Viruses are stray strands of DNA that behave like a living organism when they cross the cell wall barrier, and then start replicating themselves. Diseased cells often have proteins that will transport poisons into the cell, as well as proteins that protrude through the sidewalls of the cell.

Proteins left over from dead cells have amino acids that contain sulfur, which certain bacteria use as food, producing foul smelling substances known as mercaptans and hydrogen sulfide (H₂S). Proteinaceous waste materials are some of the hardest substances to control as they grow bacteria faster than most other materials.

The *Microbe Balancer* formula catalytically degrades unhealthy proteins and breaks chemical bonds that hold them together. In waste systems it also deactivates certain organisms that feed on the proteins while allowing other more benign organisms to degrade the proteins by means that do not generate odor. When proteins make up the surface of the cell of unhealthy organisms, our formula will degrade the

surface of the cell and cause the cell to be compromised and eliminated. Surprisingly, as if by some miracle, this process is selective via the salt marker within the protein itself.

Note: Within the first few weeks of starting on this product a significant amount of detoxification may occur in the body, in a short period of time and rashes may appear on the skin. If this occurs many people choose to reduce the amount of *Microbe Balancer* they are taking until the rash goes away.

Ingredients:

Black Cumin (*Nigella Sativa*), Spearmint (*Mentha Spicata*), Peppermint (*Mentha Piperita*), Chocolate (*Theobroma Cacao**) Fern (*Cyathea*), Fern (*Dicksoniaceae*), Fern (*Cyathea*).

*Contains no caffeine or Theobromine

Suggested Use: The first three days take 25 drops of *Microbe Balancer* in one ounce of water (more if desired). Then increase to 50-75 drops per day. Decrease if experiencing ongoing diarrhea.

Total Body Detox: Gradually increase to 100-150 drops or more per day until experiencing a significant flushing of the body (diarrhea). Then decrease to 50-75 drops per day.

NOTE: IF YOU FIND THE TASTE TO BE UNPLEASANT YOU CAN PURCHASE EMPTY CAPSULES AT YOUR LOCAL HEALTH FOOD STORE. THE BEST SIZE CAPSULE FOR THIS PURPOSE IS 00 (DOUBLE OTT) BECAUSE THEY ARE SMALL AND EASY TO SWALLOW AND HOLD 25 DROPS OF PRODUCT.

Caution: AVOID CONTACT WITH EYES as this product may cause temporarily blurred vision, redness, and irritation of the eyes. Flush with cool water. Avoid prolonged exposure of undiluted *Microbe Balancer* to the skin. If using as a topical skin product avoid direct sunlight because of increased sensitivity to sunlight.
